• APP WB 910 Wasserbasis Reiniger for conventional and waterborne systems

APP WB 910 cleaner is the water-soluble cleaner of very low content of organic solvents, below 20%. Due to content of isopropyl alcohol the cleaner perfectly removes contaminants for the surfaces prepared for painting with the top coats. It prevents occurrence of silicone pits and assures maximum adherence for applied organic and water-soluble products.

W 900 / W 911	WB 910
Mixture of high-test gasolines	Mixture of alcohols
Surface degreasing from the substances like silicones, tar, fats, oils, greases	Removing the contaminants like greases, oils, mineral salt, dust
-	Antistatic properties
Necessary in each paint shop	Necessary in paint shops using the water-soluble and conventional systems

ADVANTAGES:

- WB910 cleaner has the anti-static properties, eliminates static charges leading to accumulation of high amount of dusts on the surface
- The washer does not leave smudges, particularly visible on the silver base coats

APPLICATION:

Steel, aluminium, galvanized steel, old lacquer coatings, filling primers, polyester putties, and plastics.
