

TROTON BRAYT

R1 REGENERATION

DESCRIPTION

Product intended to restore and refresh plastic surfaces. Suitable also for metal (chrome, brass, stainless steel, aluminium) and painted or varnished surfaces. Agent has a strong penetrating ability and thanks to it can restore lost color and luster. After drying, it creates flexible and resistant finishing coating.

PRODUCT BENEFITS:

- Easy to use
- Suitable for many surfaces, like: plastic, chrome, brass, steel, aluminium, stone
- Gives long-lasting renewal effect
- Creates flexible coating which protects the surface
- Penetrates deep into the surface leaving gloss up to 12 months

PROCESSING:

Polish the surface with a microfiber cloth

RECOMMENDED BRAYT APPLICATORS:

Microfiber cloth (recommended: grey)

DIRECTIONS FOR USE

- Surface to be treated should be clean and dry. All layers of waxes and silicone should be removed. Plastic should be cleaned with warm water with soap, rinse thoroughly and wait at least 12 hours to dry completely
- It's not recommended to use on white lacquers
- Using the clean cloth or brush apply product evenly on the surface
- Recommended application temperature is 5-35°C. Do not apply on hot surface
- Leave for 10-20 min (it's recommended to work on the surface of which can be completed within max. 20 min)
- Remove product residue with a clean cloth
- Leave until dry and then polish using a dry microfiber cloth to obtain better gloss
